Understand Multiplication as a Comparison

ESSON

Dear Family,

This week your child is exploring multiplication as a comparison.

Your child is learning about multiplication as a way to compare two numbers.

This model shows that 12 is 3 times as many as 4.

You can write the comparison as a multiplication equation:

$$12 = 3 \times 4$$

This model shows that

12 is 4 times as many as 3.

but can write the comparison a

You can write the comparison as a multiplication equation:

$$12 = 4 \times 3$$

Your child is also learning how to use bar models to help understand multiplication as a comparison.

This bar model shows that 20 is 4 times as many as 5: $20 = 4 \times 5$.

Invite your child to share what he or she knows about multiplication as a comparison by doing the following activity together.

ACTIVITY MULTIPLICATION AS A COMPARISON

Do this activity with your child to explore multiplication as a comparison.

Materials 20 pennies or other identical small objects

• With your child, arrange 10 pennies to show that 10 is 2 times as many as 5. The pennies should look like this:

- Now ask your child to arrange 10 pennies to show that 10 is 5 times as many as 2. (The pennies should be arranged in 5 rows with 2 pennies in each row.)
- Repeat the activity, asking your child to arrange pennies to show other multiplication comparisons.

Examples:

14 is 7 times as many as 2.

14 is 2 times as many as 7.

18 is 6 times as many as 3.

18 is 3 times as many as 6.

Look for real-life opportunities to explore multiplication as a comparison of two numbers with your child.
